

Goal • Increase your ability to find and use scientific information and refer to sources on the Internet.

What to Do

- Use the outline below to help you record information from one Internet source.

Outline

1. What topic are you researching?

2. List the key words you could use for this search.

3. Record the web address for the source you are using.

4. List five main points you have picked up from this source.

5. List any important visuals or diagrams. Include page numbers and information. If the visual is very important to your research, make a copy on a separate sheet of paper or save it to your computer. Remember to record the web address as a reference.

6. Briefly summarize the information gathered from this source.
