ASSESSMENT

Controlling Variables Rubric

BLM A-28

When assessing students' understanding and ability to apply controls to variables, consider if the student:

□ isolates all possible variables directly related to the outcome of an experiment	
□ maintains a high level of quality control for the fair testing of outcomes	
□ identifies quantities of key factors and any possible relationships as relevant variables in a test	4
□ isolates variables directly related to the outcome of an experiment	
□ maintains quality control for the fair testing of outcomes	
□ identifies quantities of key factors as relevant variables in a test	3
□ isolates some variables related to the outcome of an experiment	
□ attempts fair testing of outcomes	
□ identifies some quantities of key factors as relevant variables in a test	2
□ does not control variables	
□ maintains little or no quality control during testing	1
□ does not identify key factors	'
