

Goal • Use this activity to review concepts you have learned.

What to Do

Think about the topic you have just completed. In the spaces below, write 5 things that you know about the topic. When your teacher gives the signal, stand up and find a partner. Share your list with your partner and then listen to your partner's list. Add to your list one idea from your partner's list that you don't already have. Continue meeting with new partners and exchange ideas until your teacher signals to return to your seat.
