Section 11.4 Research Project

Finalize your research project.

1. The animal you are studying is _____.

2. List 2 things you learned about the animal's survival.

3. Describe where the animal usually lives.

4. Explain 1 reason your animal is endangered.

5. Give 1 website URL, or the name of 1 book or magazine where you got your information about the animal's population. Include information like the date of the information and who produced it or wrote it.

Name: _____

Date: _____

BLM 11-5

6. Describe how the scientists might have found the number of animals.

Did survey techniques include

- catch and release or
- remote photography?

7. Why might it be difficult to count the entire population for your animal?

8. How does using probability help with the population count?

9. Predict what you think will happen to the population of your animal if nothing is done to protect them.

Explain your thinking based on the data you collected in your research.
