Venn Diagram Checklist

	Assessment					
Criteria	Self			Teacher's		
	No	Sometimes	Yes	No	Sometimes	Yes
The objects or events to be compared are stated clearly.						
A thoughtful list of characteristics unique and important to object or event number 1 is made. Appropriate and accurate information has been used to make this list.						
A thoughtful list of characteristics unique and important to object or event number 2 is made. Appropriate and accurate information has been used to make this list.						
The characteristics chosen to contrast the objects or events show a clear understanding of the science involved.						
5. A list of important characteristics common to the objects or events being compared is made. Appropriate and accurate information has been used to make this list.						
6. The common set of characteristics chosen shows a clear understanding of the science involved.						
7. There is a priority order within the lists that shows an understanding of what is important to the task at hand.						
The Venn diagram is neat and presentable.
