Pinwheel Template

Make your pinwheel.
- Cut out the pinwheel square. You can use this template to cut out a pinwheel from an aluminum plate or construction paper.
- Cut along the four lines of the diagonals. Stop at the end of the dotted lines.
- Bend (do *not* fold) one of the cut corners to the centre point. Skip the next cut corner and bend the next one. Continue until four points meet at the centre.
- Stick a pushpin through all four points and the back of the pinwheel. If necessary, you can use glue or tape.
- Stick the pin into a straw.
