Research Safe Practices

Many farm workers handle birds, which may be infected with bird flu. Perform research on safe practices that are used to reduce the risk of workers getting the bird flu.

1. Go to the web site that your teacher provides.

- Scan the article.
- Consider printing the section that talks about advice for farm workers.
- Highlight the information about safe practices.

2. Write four or five ideas that you think are important. Use point-form notes.

3. What safety advice might you give a farm worker who handles birds?

4. Present your safety advice in an oral presentation. Imagine you are addressing farm workers. Check off each tip as you plan to use it.

- ☐ Introduce your topic and explain why it's important to follow safety advice.
- ☐ Present your supporting points in logical order.
- ☐ Speak clearly.
- ☐ Make eye contact.
