

# Symbiotic Relationships

1. Name each type of symbiotic relationship. Explain your thinking. Use these questions as a guide.

- Who is helped?
- Who is harmed?
- Who is not helped or harmed?

Symbiotic Relationship	Type	Explanation
<p><b>a)</b> The cowbird eats insects that the bison stirs up as it walks through grass.</p> <p style="text-align: center;">RIGHTS NOT AVAILABLE</p>		
<p><b>b)</b> The morel mushroom helps elm tree roots absorb water and nutrients. The sugars made by the tree are used by the mushroom.</p> <p style="text-align: center;">RIGHTS NOT AVAILABLE</p>		
<p><b>c)</b> Lice bite and suck blood from humans. Humans get no benefit, and an itchy spot.</p> <p style="text-align: center;">RIGHTS NOT AVAILABLE</p>		
<p><b>d)</b> The barnacles on the whale eat tiny food as the whale swims.</p> <p style="text-align: center;">RIGHTS NOT AVAILABLE</p>
