

**CHAPTER 1**  
**HANDOUT**

# Terrestrial and Aquatic Food Chains

**BLM 1.2.1**

Answer the following questions in the space provided.

## Questions

1. Fill in the information that is missing in the above diagram.

<b>CHAPTER 1</b>	<b>Terrestrial and Aquatic Food Chains</b>	<b>BLM 1.2.1</b>
<b>HANDOUT</b>		

2. Describe three ways in which organisms in aquatic and terrestrial ecosystems may be organized.

---

---

---

3. Where would decomposers fit into the terrestrial and aquatic food chains shown?

---

---

4. What do the arrows represent in the above food chains?

---

---

5. In the marine food chain shown, the carnivore at the fourth trophic level is over-fished and the population of this species decreases drastically. What effect will this change have on the species found at the other trophic levels?

---

---

---

---
