

CHAPTER 15	Thought Lab 15.2: Evaluating Reproductive Technologies: Safety and Effectiveness Answer Key	BLM 15.3.1A
ANSWER KEY		

Answers to Analysis Questions

1. You could list factors such as mother's health, health and survival of the fetus, father's health, long-term effects, optimum conditions required, or failure/success rates. Assessment of risk may include long-term health of mother or likelihood of fetus surviving or being disabled in some way.
2. Arguments should reflect the relevant definitions that have been chosen and consider the priorities chosen or agreed upon.

Extension

3. Other factors could include: accessibility, ease of use, cost, social attitudes, cultural or religious taboos, partner's preferences, and permanence of method.
