

Section 2.3 Math Link

This worksheet will help you with the Math Link on page 71.

During the game described in the Math Link, the following four cards were dealt:

The heart and the diamond are positive values, and the club and the spade are negative values.

1. Use the cards to create products of fractions.

- Estimate.
- Then, calculate.

Record these products in the table. An example is provided.

Product	Estimate	Calculation
$\frac{8}{2} \times \frac{(-7)}{-3}$		

- Identify the product that is furthest from zero. _____
- List any patterns you see in the table.
- Was it necessary to list all possible products to determine the product furthest from zero? Why or why not?
