Body Art Safety

**RIGHTS
NOT
AVAILABLE**

The tools used in piercing may get contaminated with blood or body fluids carrying disease. The pathogens carrying disease can enter the blood of other clients.

Research body art safety. Find out about the health risks and how you can protect yourself from disease.

1. What topic are you researching?

2. Use a search engine to find information about body art safety. Use key words such as tattoo safety, body piercing safety, or body art safety. List the key words you will use.

3. Explore websites by clicking on the links. Study the pictures and read the titles and subtitles to get an idea of the content. Write the title of a useful website.

4. Choose one link to read in detail. Write the title of the link.

Name: _____ Date: _____

5. Write four or five ideas from this link that you think are important.
Use point-form notes.

6. What safety advice might you give a friend who wants to get a safe piercing?
