

Practice: Multiply Two Binomials

- Find each product.
 - $(x + 9)^2$
 - $(x + 10)^2$
 - $(x - 7)^2$
 - $(x - 8)^2$
- Expand and simplify.
 - $(x + 1)(x + 2)$
 - $(x + 3)(x - 1)$
 - $(x - 4)(x + 6)$
 - $(x - 5)(x - 7)$
- Find each square.
 - $(2x + 3)^2$
 - $(4x + 5)^2$
 - $(3x - 2)^2$
 - $(5x - 1)^2$
- Expand and simplify.
 - $(4x + 1)(3x + 1)$
 - $(5x + 2)(6x - 1)$
 - $(3x - 4)(2x + 3)$
 - $(7x - 5)(5x - 7)$
- Find each product.
 - $(x + 3)(x + 6)$
 - $(x + 3)(x - 6)$
 - $(x - 3)(x + 6)$
 - $(x - 3)(x - 6)$
- Walt shovels his driveway every morning during winter. The length of the driveway is $2x + 7$, while the width is $x + 3$. Write a quadratic expression that represents the area that Walt has to shovel.
- Gina is setting up a flower garden for her mother in the backyard. The dimensions of the flower garden are $(x + 5)$ by $(3x + 1)$.
 - Write a quadratic expression that represents the area of the flower garden.
 - Suppose Gina wants to build a small fence around the garden. Write an expression to represent the perimeter of the fence.
- Donna wants to paint the walls of her bedroom. The dimensions of each wall are $(x + 1)$ by $(4x + 1)$.
 - Write a quadratic expression that represents the area of one wall.
 - Write a quadratic expression that represents the area of the entire room with four walls.
 - If $x = 2$ m, what is the area of the entire room?
 - If paint costs $\$0.50/\text{m}^2$, how much will it cost Donna to paint her room?
- Austin mows his neighbour's lawn during the summer. His neighbour's lawn is $(2x + 3)$ by $(3x + 2)$.
 - Write a quadratic expression that represents the area of the lawn.
 - If $x = 2$ m, what is the area that needs to be mowed?
 - If Austin charges his neighbour $\$0.25/\text{m}^2$ mowed, how much money will Austin make?
- A wooden picture frame is in the shape of a square, and each side is $(3x + 1)$ long. A smaller square is cut out, so there is a viewing area for the picture. The smaller square has sides $(2x + 1)$ long.

$3x + 1$

 $2x + 1$

 - Write a quadratic expression that represents the area of the frame with the square cut out of it.
 - If $x = 5$ cm, what is the actual area of the picture frame with the square cut out of it?
