## Pythagorean Theorem

1. For each right triangle, find the length of the indicated side to the nearest tenth of a unit.

## Nets

2. For each net, identify the solid.

## Convert Measurements

3. Convert each measure to the indicated unit.

- |                         |               |
|-------------------------|---------------|
| a) 184 cm               | metres        |
| b) 27 gal               | pints         |
| c) 6.8 yd               | feet          |
| d) 12.3 L               | millilitres   |
| e) 5.2 yd <sup>3</sup>  | cubic feet    |
| f) 4200 cm <sup>2</sup> | square metres |

## Area

4. Find the area of each figure.
