Chapter 3 Wrap It Up!

This worksheet will help you with the Chapter 3 Wrap It Up! on page 119.

Look at the diagram of the Victoria International Airport in the student resource. Use it as an example to complete your airport design.

1. Make any revisions that you think will make your airport better. Add details such as
 - a passenger terminal
 - a control tower
 - an air freight area
 - a fire hall
 - an aircraft maintenance area
2. Write a one-page report that explains why you designed your airport the way you did. Use the outline below to help you.

a) My airport could be built near _____.

b) This is what I was planning when I designed the runways: _____

c) The control tower should be located _____
because _____.

d) It's important to have a firehall nearby because _____

_____.

I placed the firehall _____
because _____

_____.

e) Aircraft need a lot of maintenance. That's why the maintenance area is located _____.

_____.

Name: _____ Date: _____

BLM 3-14
(continued)

f) My airport will move both passengers and freight. The passenger terminal is designed to provide the following services: _____

It is located _____ because _____

g) I expect my airport to move the following types of freight: _____

This is how I made it easy to get that freight from the airport to where it is needed: _____

h) Airports also need to look attractive. That's why I included the following items on my design: _____
