

Section 2.1 Extra Practice

1. Estimate, and then measure each item. Round to the nearest foot.
 - a) the height of a wall
 - b) the width of the seat of a chair
 - c) the height of a classmate
 - d) the length of a classmate's arm
2. Estimate, and then measure each item. Round to the nearest inch.
 - a) the length of a pen
 - b) the width of a page
 - c) the length of a CD case
 - d) the length of your foot
3. Use your personal reference for 1 in. to approximate each length. Then, measure each item.
 - a) the length of a computer keyboard
 - b) the width of a cell phone
4. Use your personal reference for 1 ft to approximate each length. Then, measure each item.
 - a) the height of a chair
 - b) the width of a computer desk
5. Use measurement references to estimate each distance.
 - a) the length of a house
 - b) the length of a driveway
6. Express each answer in feet and inches.
 - a) $3'' + 10''$
 - b) $9'' + 6''$
 - c) $3' 2'' + 6' 5''$
 - d) $3' 2'' + 6' 11''$
 - e) $(4 \text{ ft } 10 \text{ in.}) \times 2$
 - f) $(6' 6'') \times 3$
7. Give the distance from the beginning of the measuring tape to the arrow.
 - a) 
 - b) 
 - c) 
 - d) 
 - e) 
 - f)

(continued)

- 8.** John is installing baseboard in a bedroom that measures 16 ft by 20 ft. The doorway and the closet in the room each measure 3 ft wide.
- a)** What is the total length of baseboard needed?
 - b)** Baseboard is sold in 8-ft and 12-ft lengths. Give two combinations of baseboard that John can buy.
- 9.** The swimming pool in Wedgewood Park is 20 yd long. What is the pool's length in feet?
- 10. a)** Nancy measures the width of a picture frame to be $3\frac{1}{4}$ in. long. Draw a line exactly $3\frac{1}{4}$ inches long.
- b)** Nancy measures the width of the picture frame mat to be $4\frac{3}{8}$ in. long. Draw a line exactly $4\frac{3}{8}$ in. long.
- 11.** Estimate, to the nearest foot, the perimeter of your bedroom.
- 12.** A soccer goal is 8 ft. deep. How could you use personal references to mark off a width of approximately 8 ft?
