

Chapter 7 Project Checklist

1. A place in my community that needs a wheelchair access ramp is _____

It needs a wheelchair access ramp because _____

2. The distance from the ground to the bottom of the door is _____

3. Wheelchair ramps cannot have an angle of elevation greater than 4.5° .

The horizontal distance from the door that the ramp must start is _____

4. Wheelchair ramps must have safety features. To make sure my ramp will be safe, I have checked;

- ☐ for trees or uneven ground that might make the location of my ramp hazardous
- ☐ that the area for my ramp is wide enough for a wheelchair to make a turn if needed
- ☐ that the width of the ramp is wide enough for a wheelchair
- ☐ that the landings at the top and bottom of the ramp are wide enough for a wheelchair.
- ☐ that the ramp includes handrails

5. The diagram of my wheelchair access ramp includes;

- ☐ the length of each part of the ramp
- ☐ the width of each part of the ramp
- ☐ the angle of each part of the ramp
- ☐ safety features, such as handrails or tread
